## HOW ORGANIZATIONS USE REGROUP + THREAT INTELLIGENCE

### ENTERPRISE

To stay informed of potential cyber threats, receive alerts during severe weather, improve security protocols based on data, alert and manage IT efforts to protect assets.

### HEALTHCARE

To receive timely COVID-19 outbreak data, receive alerts during severe weather, monitor civil unrest scenarios, alert specific teams and send notifications of shift coverage needs.

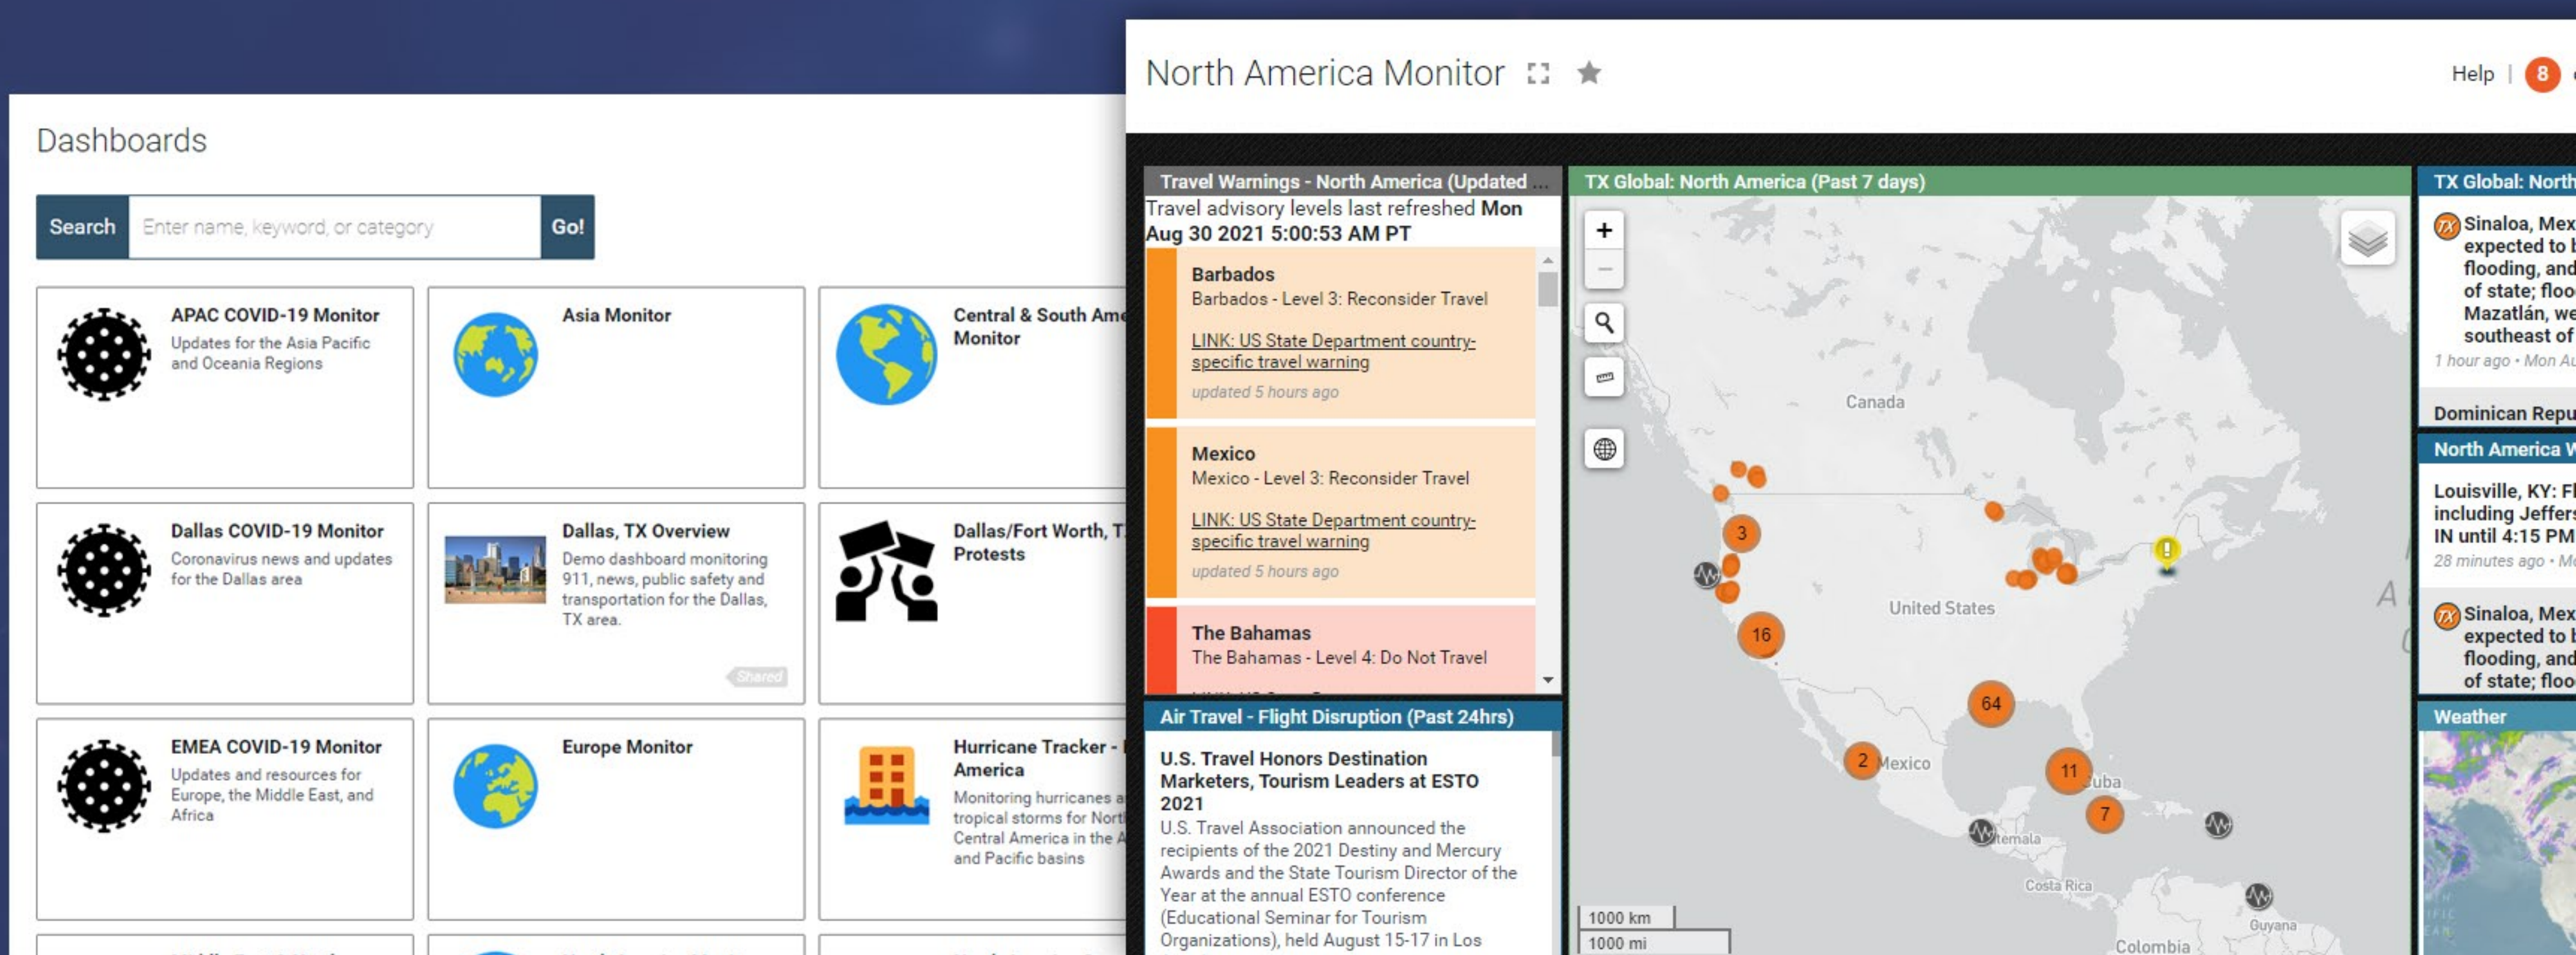

### FINANCIAL SERVICES

To stay informed about active threats to continuity and security, monitor local crime trends, receive alerts during severe weather, alert IT and security teams of potential threats before they happen.

### SECURITY COMPANIES

To gain actionable insights on crime trends, receive alerts during severe weather, active shooter situations and other threats to clients and patrons. Discreetly send notifications to team members and stakeholders.

## DISCOVER THE REGROUP DIFFERENCE

As the most trusted name in mass notifications, Regroup provides organizations from every industry the tools they need to protect people and assets. Used for emergency and everyday communication, Regroup helps improve business continuity while mitigating risks and enhancing the safety of your entire organization.
