MAXIMIZE USE OF REGROUP WITH EDUCATION INTEGRATIONS

Regroup
Mass Notification

Regroup's seamless integration with existing educational software and technology empowers educators and administrators to easily communicate from within familiar applications, eliminating learning curves and improving communications between instructors, staff, students, and parents.

canvas

Save time and make teaching easier with the ability to reach students wherever they are, directly from the Canvas dashboard. From class schedule and venue changes to upcoming quizzes and tests, Regroup for Canvas provides the easy-to-use messaging solution that teachers and students can rely on.

KEY BENEFITS

Seamless database integration between Regroup and Canvas, so you don't have to duplicate data.

Teachers never have to leave the Canvas platform, eliminating the need for additional training

Send bulk or individual SMS messages from within Canvas

Detailed reporting, including message delivery status for improved student accountability

PowerSchool

Regroup seamlessly integrates with PowerSchool's education technology for K-12 schools and districts. This integration saves both time and resources, while also providing a robust emergency preparedness tool.

KEY BENEFITS

Groups are automatically created based on school district divisions

Recipients are automatically imported and categorized by location, grade level, and more

Automatically send voice or text messages to parents of students who are late or absent with automatic attendance checks every morning

Regroup's comprehensive reporting shows the status of sent messages and whether they were received by all intended recipients

Reaching on-the-go students is a hassle-free process with Regroup's dynamic Blackboard Learn text widget integration. Course instructors can easily message one or more students via SMS/text, email, and by posting an announcement to the course homepage, all from the familiar Blackboard Learn dashboard.

KEY BENEFITS

Teachers never have to leave the familiar BBL dashboard, eliminating learning curves to get you up and running immediately

Send up to 72,000 text messages in just 60 seconds

Regroup's SMPP messaging ensures time-sensitive teacher-student communications don't get caught in carrier spam filters

Detailed reporting, including message delivery status for improved student accountability

Since 2009, Regroup has been a proud Ellucian Community Partner and integrates with Ellucian products for higher-education including Colleague, Portal, Banner and Luminis. These seamless integrations enable campus administrators, staff, faculty, and individual departments to easily reach multiple groups of people, or a single individual, from Regroup's interface.

KEY BENEFITS

Easily notify students and parents of deadlines for registration, financial aid documents and payment of tuition

Increase engagement and community participation in fundraisers, sporting events, and other campus activities

Comply with Clery Act rules for emergency notifications and timely warnings

Automatically archive messages for compliance purposes

Regroup's integration with Adirondack's "The Housing Director" allows users to easily manage dorm room vacancies. Regroup's powerful Messaging API sends text notifications — from within The Housing Director System — to quickly alert students to a vacancy.
