# REGROUP MOBILE

The Mobile App That Keeps Your Entire Network Together

Regroup

Take the power of Regroup Mass Notification with you

Regroup Mobile enables organizations like businesses, healthcare and schools to keep their people, property and continuity secured during emergencies and other critical events. It also helps them to quickly send urgent messages to entire networks or specific groups of individuals. It's the robust, reliable communications solution from the most trusted name in mass notification.

Regroup Mobile informs your networks and empowers your admins – everywhere they go.

REGROUP CLIENTS

Regroup Mobile is the essential app for all our clients, making it easy to send and receive messages when everything else fails. Whether you're an admin, leader, or staff member, this app puts the full capabilities of Regroup's platform right in the palm of your hand. Available for both iOS and Android devices.

Simplified Communications Your Way

Unlike typical text messaging, Regroup Mobile allows admins to reach specific groups of individuals or entire networks. Send urgent notifications via email, SMS, call/TTS, MS Teams, social media, RSS, alarm and siren activations, digital signage, desktop notifications and more.

Two-Tap Emergency Alerts

When seconds count, Regroup Mobile's pre-programmed QuickMessage Templates help you reach people fast –with only two taps. System administrators can create a complete library of templates, ready to use in virtually any situation.

Two-Way Messaging

Get replies from recipients and see them in real-time or use it like a group-chat feature. This gives system administrators the tools to take fast action to inform the team and ensure their safety.

Bulk Replies and Updates

Regroup Mobile allows admins to select multiple recipients for bulk replies and updates. You can also select recipients in bulk, based on their response to the original notification.

In-App Reporting

View detailed delivery statistics from the entire network on your mobile device. Reports are also saved and available in your Regroup cloud-based platform.

Panic Alerts

Allow individuals to trigger an emergency message that comes back to a response team. Even contacts without message-sending access can report incidents directly, ensuring rapid and appropriate action. Additionally, Panic Alerts can be tailored to an organization's specific needs, allowing for customized workflows.

MESSAGE RECIPIENTS

Being a member of an organization that utilizes Regroup Mass Notification means you have access to our mobile app. This tool lets you tailor your alert settings and how you receive communications to fit your preferences.

Get Alerts - Every Time

With an active data or Wi-Fi connection, alerts reach your device reliably, bypassing congested local cellular networks that might hinder SMS or voice calls. Ensure you never miss a critical update.
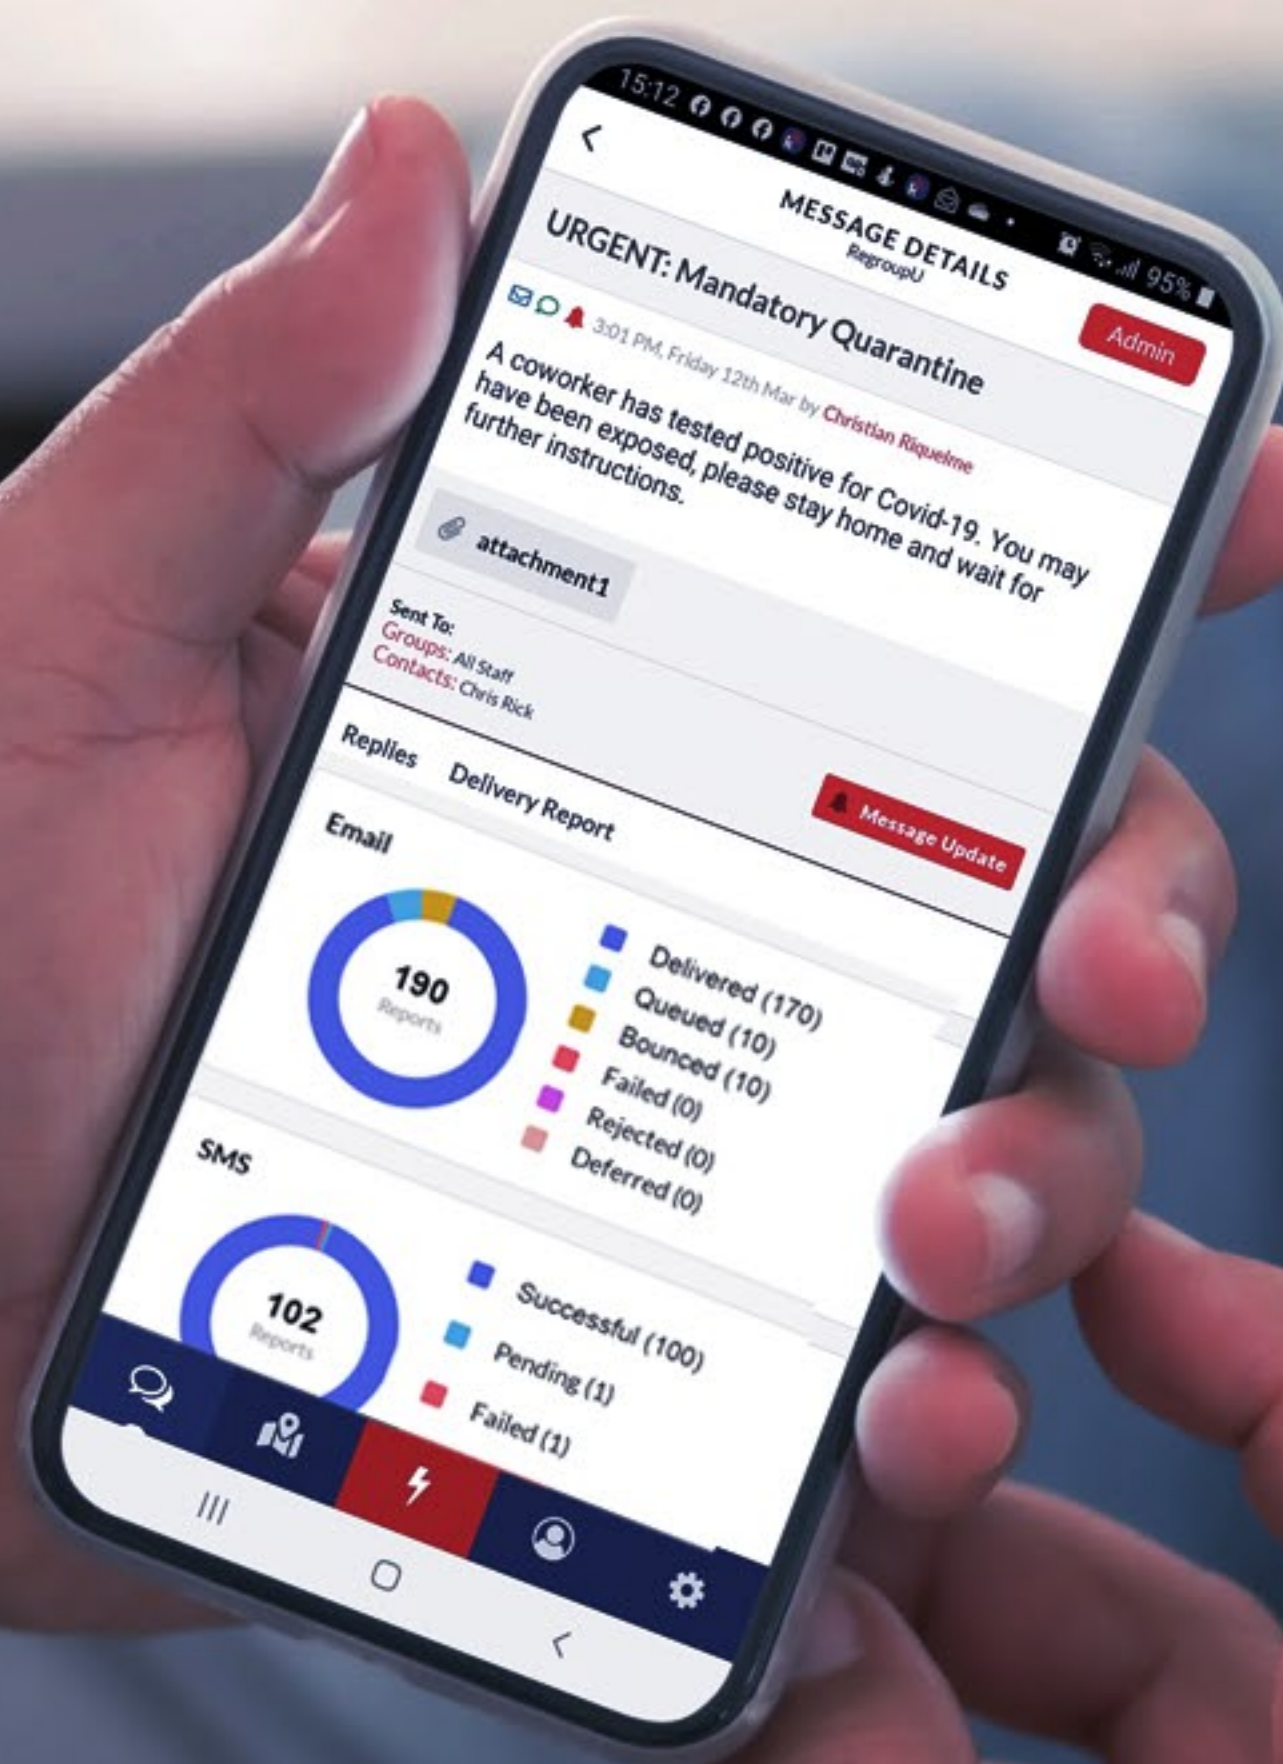

Location-Based Alerts

Regroup Mobile ensures you stay informed and secure by sending messages when you're within a designated Geofence area, providing vital updates during critical situations nearby.

Easy Configuration

Configure Regroup Mobile to your liking with customized notification preferences, contact information and more.
