

# FINANCIAL INSTITUTIONS

Enhance your financial institution's safety, efficiency, and operational continuity with Regroup's advanced mass notification system. Whether managing routine communications or responding to critical events, Regroup empowers your team to always stay connected and informed.

## Critical Features for Financial Institutions

### Global Messaging Capabilities

Ensure every branch, office, and remote team member stays informed with real-time messaging delivered in over 80 languages through multiple channels. Regroup's system enables seamless communication worldwide, keeping your entire organization aligned, no matter where they are located.

### Automated Alerts

Integrate seamlessly with NOAA and IPAWS to automatically distribute real-time weather and emergency alerts. Regroup helps your institution avoid potential risks, ensuring your team and customers are always informed about critical developments.

### Geo-Fencing

Target specific branches or geographic regions with tailored communications during localized incidents. With Regroup's geo-fencing capabilities, you can ensure relevant and precise messaging reaches the right people at the right time.

### Threat Intelligence

Leverage advanced threat monitoring and alerts to manage risks, protecting your assets and personnel proactively. Regroup's system informs you about potential threats, enabling swift action to mitigate risks.

"Regroup helps us communicate more efficiently within our project teams and trade partners. We use the system to communicate various types of announcements, reminders, and alerts. It's a great tool to quickly distribute important information throughout the team."

C.J  
Manager of I.T Training

### Two-Way Messaging

Enable real-time feedback and responses during emergencies, facilitating welfare checks and immediate decision-making. Regroup’s two-way communication features allow your team to stay connected and responsive in critical situations.

### Unlimited Groups and Templates

Customize and streamline your communications with unlimited message templates and group settings. Regroup ensures consistent and efficient outreach, whether you’re targeting specific departments, locations, or customer segments.

### High-Capacity Notifications

Deliver high-volume communications swiftly, with the capacity to handle thousands of messages per minute across voice, SMS, email, and push notifications. Regroup ensures timely communication during crises, maintaining operational continuity.

### Real-Time Reporting

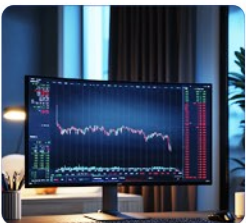

Access detailed reports to assess communication effectiveness, maintain compliance, and improve future strategies. Regroup’s reporting tools provide transparency and accountability, helping you optimize your communication efforts.

## Tailored Solutions for Financial Institutions

### Retail Banking

Notify customers and staff instantly about branch closures, ATM outages, and fraud alerts, ensuring they receive the information they need when it matters most.

### Investment Banking

Coordinate between global offices during market shifts and critical financial events, keeping all stakeholders informed and aligned during high-stakes situations.

## DID YOU KNOW?

### Integration Capabilities

Regroup’s platform is compatible with a wide range of API-capable third-party systems. We ensure your communication tools are fully integrated for optimal performance, whether it’s Active Directory, alarm systems, or NOAA alerts.

Regroup can send

**80,000**

SMS / minute

**120,000**

emails / minute

**30,000**
